SOLID	UI/UX	Design Patterns	Firebase SDKs	Shaders
Git	Zenject	Data Structures	AI Agents	URP

Professional Experience

Team Leader Unity Engineer | [NLTDev](#) | 02/2025 — 03/2026: **1 year 1 month**

Project: Virtual pet game where you earn money to care for pets, upgrade homes, and dress them.

Responsible for: task management & approval; game architecture & content; client presentations.

- Led a cross-functional team of 3, maintaining close collaboration with other teams.
- Shipped the production-ready product to the client on schedule and within budget.
- Designed a scalable project architecture that kept development manageable.
- Built a complete client-server communication layer using UnityWebRequest(REST API).
- Optimized the project to a consistent 60+ FPS on low-end mobile devices.

Middle Unity Developer | [N-iX Games](#) | 08/2023 — 01/2025: **1 year 5 months**

Project: [Netflix Stories](#). A hub with 9 choice-driven visual novels based on popular Netflix series.

Responsible for: 2 visual novels content development; core systems; editor tools.

- Reduced the crash rate from 2% to 0.4% by fixing the Addressables memory leak.
- Delivered 22 complete chapters in total, ensuring production-ready quality and stability.
- Built a Unity Editor tool that auto-matched localization keys, speeding up dialogue setup.

Junior Unity Developer | [Tatem Games](#) | 08/2020 — 09/2022: **2 years 1 month**

Projects in store: [Merge Defense Adventures](#), [Block King Puzzle](#), [Card Match - Matching Puzzle](#)

- Shipped 7 complete games from concept to release while working on different teams.
