My profile

I own Unity features, systems, and complete projects from idea to release.
I build clean, scalable architecture and optimize projects to a consistent 60+ FPS on low-end devices.

Tech Stack

Unity 2D/3D	Addressables	Memory Management	iOS&Android&Web&PC	Unity UI (uGUI)
C#	Profiling	CPU Optimization	Client-Server(REST API)	Visual Effects
OOP	Game Physics	GPU Optimization	Agile/Scrum/Kanban	Animations
SOLID	UI/UX	Design Patterns	Firebase SDKs	Shaders
Git	Zenject	Data Structures	AI Agents	URP

Professional Experience

Middle Unity Developer | NLTDev | 02/2025 — 03/2026: **1 year 1 month**
Project: Virtual pet game (earn currency, care for pets, upgrade homes, customize appearance)

- Designed a scalable project architecture that supported ongoing feature and content development.
- Built a complete client-server communication layer from scratch using UnityWebRequest and a REST API, including mock server support, request signing, and offline request queueing.
- Optimized the game to a consistent 60+ FPS on low-end mobile devices.
- Ported the game to WebGL, resolving platform-specific issues with asynchronous code, localization, input, and unsupported graphical features.
- Created Unity Editor tools that automated repetitive tasks in the 3D artist's workflow and simplified the graphics optimization pipeline.

Middle Unity Developer | N-iX Games | 08/2023 — 01/2025: **1 year 5 months**
Project: Netflix Stories. A hub with 9 choice-driven visual novels based on popular Netflix series.

- Reduced the crash rate from 2% to 0.4% by fixing the Addressables memory leak.
- Delivered 22 complete chapters in total, ensuring production-ready quality and stability.
- Built a Unity Editor tool that auto-matched localization keys, speeding up dialogue setup.

Junior Unity Developer | Tatem Games | 08/2020 — 09/2022: **2 years 1 month**
Projects in store: Merge Defense Adventures, Block King Puzzle, Card Match - Matching Puzzle

- Reduced battery consumption by 18% for **Merge Defense Adventures** by implementing reactive logic, optimizing UI elements, art assets, and rendering settings.
- Improved D1 Retention from 32% to 44% in **Arachnophobia!** with more visual feedback and VFX.
- Reduced GC spikes in **Block King Puzzle** from 8ms to 5ms by optimizing uGUI.

Education: Salvador Dali Academy | Kyiv, Ukraine | 2019 - 2023 | **B.Sc. in Graphic Design(86/100)**

Language: English: B2 (Advanced) | Ukrainian: C1 (Fluent) | Russian: C2 (Native)
